

CONGRATULATIONS A-1 CRANE SERVICE

When A-1 Crane Service in Sacramento was ready to upgrade their boom truck they turned to the expertise of Coastline Equipment Crane Division. The Manitex 26101C was a perfect fit since he already owned one! It has a 26 ton maximum capacity and 101' of main boom and with the 29' jib has a tip height of 141 feet! And with the 22' flatbed they can haul everything he needed to haul and more. This is A-1 Crane Service 2nd Manitex machine purchased thru Coastline Equipment Crane Division and he couldn't be more satisfied with the performance and value of the Manitex and the service of Coastline.
